""""""""Apartments in a new complex under construction in Germasogeia, Limassol. Each apartment has a covered veranda, a parking space and a storage room, and on the top floor there are penthouses with a roof garden and a swimming pool. The design of the building is based on the latest European standards, the building has a high-speed elevator. The structures are designed with seismic resistance in mind. The foundation and structure of the building consist of reinforced concrete type C30/C37 with high-strength steel reinforcement conforming to the Antiseismic standards of Cyprus.

The building will use a composite external thermal insulation system with a suitable insulating polystyrene foam ...
